Dry Seal™

Multi-purpose Putty Replacement

Dry Seal™ is a moisture and UV-resistant alternative to traditional putty. Unlike linseed oil putty, it cures very quickly and remains permanently elastic, with excellent adhesion to glass, wood, metal and stone.

It is a quick to apply bedding and face glazing compound and is particularly suitable for new window manufacture and all restoration applications. It is compatible with double glazing, including slim-line units, laminated and acoustic glass.

Durable joinery repair products

Repair Care Dry Seal™

Multi-Purpose Putty Replacement

- Can be painted in as little as 2 hours (at 20°C)
- Application temperature: 5 - 40°C
- Application period: 15 minutes
- Available in white and brown
- Can be used in a standard skeleton gun

Repair Care Dry Seal™

Don't Replace - *Repair it with Timbabuild*

- An epoxy-based wood repair system for both extensive and small repairs in timber
- Durable, high strength formula that does not shrink and offers excellent bonding
- Quick and easy to apply using the 1:1 dispensing gun

Traditionally, damaged timber has proven difficult to repair and often replacement of the entire unit has been considered the most cost effective option.

Timbabuild however, is proven to provide permanent, high-strength invisible repairs, in situ, to areas of damaged & rot affected timber, which can be sanded & painted to match & is **guaranteed to last for 10 years.**
