Glazing Tape

Flexistrip

The market-leading glazing tape.

- The market-leading load bearing security glazing tape
- Ideal for factory glaziers, site glaziers and specifiers
- Used for installing double glazed units, laminated glass and single glass into timber windows and doors
- Apply straight to coated timber, no need for capping, and can be coated with water or solvent based paints & stains
- Flexistrip lasts over 20 years, depending on conditions.

PVC Security Glazing Tape

High density PVC foam combined with high performance solvent acrylic adhesive, suited to bonding difficult and dissimilar substrates and surfaces to offer excellent sealing, dampening and vibration absorbing capabilities.

- High performance PVC foam
- High initial tack, even at low temperatures
- Suitable for metals, wood, UPVC and many plastics.
- Provides excellent conformability
- High initial tack, even at low temperatures
- High shear, high peel, high adhesive mass
- Adhesive will not delaminate from the foam

Georgian Bar Tape

Medium density, polyolefin foam with a permanent bonding adhesive, suited to bonding difficult and dissimilar substrates and surfaces to offer excellent sealing, dampening & vibration absorbing capabilities.

- Superior bonding characteristics
- Ideal for external applications
- Suitable for metals, ceramics, many plastics, and even painted, lacquered or powder coated finishes.
- High shear, high peel, highly cohesive mass
- Ideal for permanent fixing & mounting applications

The Expanding Joint Sealing Tape

- An easy to apply 'dry' strip seal used to resist weather ingress
- Combines a resilient PU foam with water resisting binder, which is UV resistant, has flame retardant properties, and is tested to DIN 52453 Watertight Against Driving Rain
- Ideal for window and door perimeter seals and expansion joints
- Expands to find its own level and can seal against uneven surfaces
- Multiple uses; weather-proof at 75% compression, draught seal at 50% compression, and soundproofing at 10% compression
- Supplied in pre-compressed (to 85%) self-adhesive rolls
