

Protect and colour wood in a single coat

Wood is a natural and noble resource - that deserves superior protection.

The superior range of Rubio Monocoat Oils have been developed using natural ingredients to offer an environmentally friendly and incomparable wood finish collection. The **Rubio Monocoat Hybrid Wood Protector** is suitable for all types of wood, both inside and out and is available in 12 traditional colours as standard.

An advanced molecular bonding technology enables Rubio Monocoat Oils to adhere to the uppermost cellulose fibres of the wood within just a couple of minutes, offering durable protection in just one coat.

Its unrivalled and innovative characteristics make application extremely clean and easy, with no complicated maintenance (no sanding!) and creates time and labour savings of up to 42%.

- One coat, with no overlaps
- Economical
- Suitable for all types of wood
- Durable protection
- Natural ingredients, VOC-free
- Easy to maintain & repair
- Unrivalled choice of colours

One coat and you're done.

Most wood finishing oils require multiple applications to achieve the final result, yet Rubio Monocoat offers durable colouring and protection in just one single layer.

Just 1 litre of monoccoat is enough to treat up to 30m² of wood!

Durable Protection

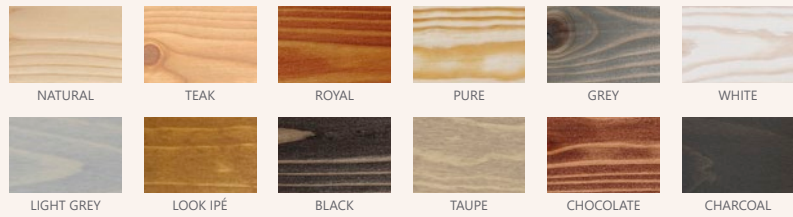

Advanced molecular bonding offers a durable finish, with long lasting protection that is easy to maintain. Isolated scratches or damage can be very easily repaired.

No Overlaps

Once the fibres are bonded with the oil, the wood simply will not absorb any further product - which makes a second layer unnecessary.

One oil, one coat, inside & out.

Available in 12 traditional colours:

Application in 3 easy steps:

Preparation:

Wet the wood and clean the surface with a medium hard nylon brush using RMC Exterior Wood Cleaner. Rinse thoroughly.

Step 1: Apply the oil

Step 2: Allow to react

Step 3: Remove any excess oil.
