Liquid Tape

Innovative easy to apply and remove protective gel

- Water-based gel that after drying forms a strong, flexible, and easily removable membrane
- Offers good protection against scratches, paint, plaster, cement, PU foam etc.
- Good adhesion to almost all surfaces and does not slip

Application

1. Apply to dry and clean surfaces with a brush, roller or airless spraying device
(tip: The thicker the layer, the simpler to remove.)
2. When the work is complete, simply peel the flexible membrane off of the surface.
Peeling off is still easy even after months.
