## MP10 Restricted Cylinders High Security

The Eurospec MP10 restricted 10 pin cylinders are the ideal solution to applications that require high key security, large numbers of different key profiles and extensive master keying capabilities.

In addition to the 6 main security pins, the MP10 system has 4 unique side pins that provide a high degree of security. These side pins offer additional pick resistance and can operate in a variety of different locations in the cylinder.

- Meets the standards identified by Secured by Design UK police initiative
- Features include; anti drill, anti pick, anti bump, fire door 30/60 rated.
- Certified to British/European standards (BS EN 1303).
- Restricted keys - only available through approved distributors

## 11 pins offering over 1 million key differs controlled with a single Master Key

We are able to supply ISEO Cylinders in an extensive range of sizes: available Keyed to Differ, Keyed Alike & Master Keyed.

The 11 pin flat key system with anti drill protection, offers over 1 million effective key differs providing excellent and versatile Master Suiting possibilities where complex master keying is needed.
