Standard Window Restrictor

Standard Window Restrictor

#		
REH607	Right Hand	
REH608	Left Hand	

Window Restrictor Arm

- For large top hung vents, the Restrictor Friction Arm offers extra support and greater stability whilst also limiting the opening
- Simply fit below the existing friction stay

Window Restrictor Arm

#		
RFH1215	10" Restrictor	Stainless Steel
RFH1216	14" Restrictor	Stainless Steel

Facefix Locking Cable Restrictor

Facefix Locking Cable Restrictor

#		
RJZ1217	○ White	200mm cable
RJZ1679	● Brown	200mm cable

Hinge Protector

- Additional security on the hinge side of windows providing excellent resistance to forced entry, with out affecting opening and closing performance
- One is fitted in the friction stay groove on the sash and another is fitted opposite on the frame and interlock if jemmying from the hinge side is attempted
- Quick and easy to fit, no maintenance required.

4 required per opening sash

Hinge Protector

#	
RJZ1520	13mm

Sash Compressor

- Fitted to large top hung windows where additional compression is required along the side of the window
- A cost effective alternative to wrap around gear that still allows for the sash to be locked in the night-vent position.
- Fitted into the same eurogrooves as friction hinges
- To optimise performance fit in the middle of the sash

Sash Compressor

#	
RJZ3365	13mm

Window Security Bolt
